

Workbench

DME&JDE DTJ01A

DME&JDE DTJ01A workbench is a light duty workbench for assembling products, storing testing equipment and small processing equipment such as drills and grinders. It helps our workers to work smoothly and orderly and facilitates our production efficiency.

► Technical Parameters

unit: mm

Model	Width (W)	Depth (D)	Height (H)
DTJ01A	1500	750	800

Features

► Table Top

- Standard configuration, the total thickness of the table top is 50 mm.
- The base material of the table top is high pressure forming fiberboard. The surface is high pressure attaching 2 mm thick polymer compound material. The surface is patterned, more wear-resisting. PVC long sealing strip around the edge.

► Table Legs

The table legs are made of high quality cold-rolled steel 2.0 mm thick.

► Pad Feet

All-metal pad feet, adjustable countertop balance, shockproof and moisture-proof.
